

## **Passive Perspectives**

## Second Quarter 2021

- COVID concerns cause headwind for Alternative Weight strategies
- High demand for infrastructure suppliers and companies with recurring revenues
- Real estate construction stocks underperform amidst higher input prices

## **COVID Concerns Cause Headwind for Alternative Weight**

As has been the case since the pandemic began, performance of Alternative Weight strategies in Q2 was largely driven by business risk factors. Those industries aligned with the stay-at-home theme (Information and IT) diverged from those aligned with re-opening themes (tourism, energy and value stocks in general). However, several new themes emerged with strong performance in the second quarter, notably infrastructure-related stocks and those with significant recurring revenues outperformed, which may signal defensive positioning.

After a strong last twelve months for Alternative Weight (which typically has a significant exposure to value), cap weight outperformed in Q2. Infection rates remain worryingly high in several countries and the reopening trade became less attractive from a valuation perspective as investors showed a renewed interest in technology stocks. The S&P 500 rose 8.5% for the quarter, outperforming the S&P 500 Equal Weight Index by 1.6% and the Stratified LargeCap Index by 1.7%.

**Exhibit 1. Core Index Comparison** 

		Q2 2021 (%)				12-months	
Index	Benchmark	Stratified	Benchmark	Rel.	Stratified	Benchmark	Rel.
Stratified LargeCap	S&P 500	6.8	8.5	-1.7	48.6	40.8	7.8
Stratified MidCap	S&P MidCap 400	3.9	3.6	0.3	56.8	53.2	3.6
Stratified SmallCap	S&P SmallCap 600	4.9	4.5	0.4	78.5	67.4	11.1
SEADM*	MSCI EAFE	3.4	5.4	-2.0	29.2	32.9	-3.8

#### James Fifield, CFA

Director, Syntax Europe jfifield@syntaxindices.com

<sup>\*</sup> Syntax Stratified Europe & Asia Developed Markets Index, based on the MSCI EAFE universe.

A similar dynamic was seen internationally, with the MSCI EAFE index rising 5.4% in Q2 and alternative weight underperforming by 2% (MSCI EAFE Equal Weighted rose 3.5% and its Stratified Weight counterpart, SEADM rose 3.4%).

Small and midcap stocks continued to rise in Q2 (the S&P 400 rose 3.6% and the S&P 600 rose 4.5%). Stratified Weight indices marginally outperformed their cap-weighted counterparts, with the Stratified MidCap and SmallCap rising 3.9% and 4.9%, respectively.

The performance differential between cap- and alternatively-weighted indices was driven by differences in the sector and stock weighting methodologies. Cap weight has large stock concentrations which in turn lead to uncontrolled sector weightings. Equal weight indices have diversified stock positions, but do not control for sector biases. Stratified Weight is designed to control for sector concentrations and diversifies stock positions within similar industries (see Exhibit 2). This can lead to significant relative performance differentials given the wide sector divergences.

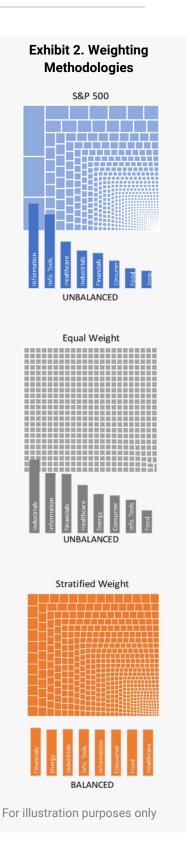

## Sector performance

Following several months of underperformance, IT stocks performed well (+4.2% vs S&P 500 and +2.2% vs MSCI EAFE) as did other "Pandemic beneficiaries", such as Healthcare and Information. On the other side of the trade, the more cyclical and travel sensitive Energy (-2.9% vs S&P 500) and Consumer (-5.3% vs S&P 500) sectors were among the worst performers as valuations have become less compelling (Exhibit 3).

Exhibit 3. Q2 sector performance by different weighting methodologies

## Trending and Emerging Sectors and Industries

We highlight the established trends and those groups that are turning in Exhibit 4 below. Performance of all broad sectors and industry groups in across different US size segments and internationally is shown in Exhibit 11.

The strong global performance of Apparel stocks over the past 12 months has propelled LVMH to become the 4<sup>th</sup> largest stock in the MSCI EAFE index (as of June 30<sup>th</sup>). Interestingly, this trend has broken down in the US, where Apparel stocks underperformed the market in Q2. We also noticed a divergence in the performance of Banking stocks, as US banks began to outperform and international banks underperformed in Q2.

"Stay at home" groups like Software, Internet Services and Pharmaceuticals outperformed globally in Q2, having underperformed during the previous nine months, while Gas and Electric utilities underperformed in every size segment and both regions.

## Identifying Themes with Affinity™

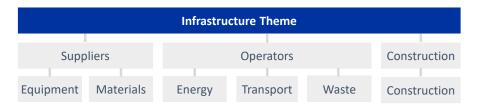

Syntax Affinity™ uses a multi-attribute classification system to view a portfolio or index from multiple perspectives. By applying different thematic lenses, Affinity™ calculates the portfolio exposure and performance for a number of cross-sector themes. These themes can be industry-based, like Tourism, or commodity-based, considering not only commodity providers, but companies involved with the entire supply chain for that commodity, or could involve any combination of business risks, e.g. companies with recurring revenues.

Stocks which contain relevant thematic attributes are sorted into homogenous groupings and organized into hierarchies from which portfolio exposures and thematic performance can be calculated. For example, the Infrastructure Theme is shown in exhibit 5 on the next page.

#### Exhibit 5. Structure of the Affinity Infrastructure Theme

Source: Syntax, Affinity™

## **Trending and Emerging Themes**

Affinity<sup>™</sup> calculates the aggregate performance of all stocks in a particular thematic group (see Exhibit 7).

In Q2, infrastructure suppliers (e.g. Caterpillar, United Rentals, Vulcan Materials) rose 9.4% as the Democrats continued to push their \$1.2 trillion infrastructure spending plan. This was in contrast to infrastructure operators (utilities, waste management, rail etc) which underperformed (+1.2% in Q2).

The best performing theme in the second quarter involved stocks with recurring revenue models (including software and REITs). This may signal that investors are focusing more on cashflow stability than growth.

Following a strong rebound in the last 12 months, Tourism was the worst performing theme in the second quarter (-5.6%), with all subgroups (airlines, cruises, hotels, casinos and booking websites) underperforming. The groups were hurt by a rise in new infections globally and this pull back follows three quarters of significant outperformance (Exhibit 6).

## **Affinity™ Thematic Lenses**

Measure portfolio exposure and performance of a wide range of themes, including:

d	2.6%
rgy	3.0%
sumer	4.2%
	Contrib.
	Relative
indution to rec	

## The outperformance was not driven by sector allocation.

The largest underweights (IT and Information) did not underperform, and the largest active weights (Food and Energy) did not outperform.

The correlation between active weight and relative performance was negligeable (-0.1).

## Stratified vs Cap Weight Sector Performance

	Strat.	Cap	Diff
Consumer	54.0%	37.0%	17.0%
Energy	37.6%	31.7%	6.0%
Food	32.6%	28.7%	3.8%
Financials	68.9%	60.4%	8.5%
Industrials	63.2%	51.6%	11.7%
Healthcare	31.4%	28.1%	3.3%
IT	52.7%	45.5%	7.2%
Information	47.7%	38.4%	9.2%
Relative			7.8%

The outperformance was driven by stock diversification, as small and value stocks outperformed their larger peers.

Stratified Weight outperformed Cap Weight in **every sector**.

Stratified Consumer and Industrials outperformed the equivalent Cap weighted sector by over 10%.

Source: Syntax, Factset.

Contribution to Relative Return and Sector Performance tables are based on 12 months from 6.30.20 to 6.30.21.

\* Sector Return is the 1-year total return of the Stratified Weight sector. Correlation is the cross-sectional correlation between active weight and sector return. Performance does not reflect fees or implementation costs.

#### SEADM relative to MSCI EAFE sector attribution

SEADM	Q2	1 year
Stratified	3.4%	29.2%
MSCI EAFE	5.4%	32.9%
Relative	-2.0%	-3.8%

The Stratified Europe and Asia Developed Markets (SEADM) Index underperformed the MSCI EAFE (-3.8%) over the last year.

#### Contribution to Relative Return

	Active Weight	Sector Return*	Relative Contrib.
Energy	4.9%	21.0%	1.1%
Food	3.8%	20.2%	0.7%
Information	1.8%	30.1%	0.4%
Healthcare	-1.8%	14.1%	0.3%
IT	0.1%	42.0%	-0.2%
Financials	-1.3%	35.4%	-1.0%
Consumer	-0.1%	29.1%	-1.5%
Industrials	-6.2%	48.2%	-3.4%
Correlation	-0.6%	Relative	-3.8%

## The underperformance was driven by sector allocation.

The largest underweight, Industrials, was the best performing sector.

The correlation between active weights and relative performance was significantly negative (-0.6), meaning that the overweights often coincided with underperformance and underweights often coincided with outperformance.

## Stratified vs Cap Weight Sector Performance

	Strat.	Cap	Diff
Energy	21.0%	19.9%	1.0%
Food	20.2%	22.7%	-2.5%
Information	30.1%	29.4%	0.7%
Healthcare	14.1%	12.1%	2.0%
IT	42.0%	44.4%	-2.4%
Financials	35.4%	37.5%	-2.1%
Consumer	29.1%	40.5%	-11.4%
Industrials	48.2%	46.6%	1.5%
Relative			-3.8%

## Stock weightings also added to the underperformance.

Significant outperformance from the largest Consumer stocks and specifically LVMH contributed to significant underperformance of Stratified Weight, vs. the market cap weighted sector.

Source: Syntax, Factset.

Contribution to Relative Return and Sector Performance tables are based on 12 months from 6.30.20 to 6.30.21. \*Sector Return is the 1-year total return of the Stratified Weight sector. Correlation is the cross-sectional correlation between active weight and sector return. Performance does not reflect fees or implementation costs.

#### Stratified MidCap relative to the S&P MidCap 400

US MidCap	Q2	1 year
Stratified	3.9%	56.8%
S&P 400	3.6%	53.2%
Relative	0.3%	3.6%

The Stratified MidCap Index outperformed the S&P 400 by **3.6%** over the last year.

#### Contribution to Relative Return

	Active	Sector	Relative
	Weight	Return*	Contrib.
IT	5.2%	60.5%	4.4%
Information	2.4%	48.6%	3.5%
Consumer	4.2%	82.4%	3.1%
Food	3.0%	41.4%	1.2%
Healthcare	2.0%	35.2%	0.9%
Energy	0.6%	41.1%	0.8%
Financials	-7.5%	65.4%	-3.6%
Industrials	-10.0%	65.5%	-6.7%
Correlation	-0.2%	Relative	3.6%

## The outperformance was not driven by sector allocation.

The MidCap universe has a relatively large number of banks and industrial companies and hence cap weight is overweight each of these sectors. Financials and Industrials did not underperform over the last 12 months, thereby hurting relative performance.

The correlation between active weight and relative performance was -0.2.

#### Stratified vs Cap Weight Sector Performance

	Strat.	Cap	Diff
IT	60.5%	43.6%	16.9%
Information	48.6%	32.9%	15.7%
Consumer	82.4%	71.0%	11.4%
Food	41.4%	42.7%	-1.3%
Healthcare	35.2%	34.3%	1.0%
Energy	41.1%	33.2%	8.0%
Financials	65.4%	61.8%	3.6%
Industrials	65.5%	67.0%	-1.6%
Relative			3.6%

## The outperformance was driven by stock diversification.

Stratified Weight outperformed Cap Weight by double digit amounts in the IT, Information and Consumer Sectors (all overweight).

Source: Syntax, Factset.

Contribution to Relative Return and Sector Performance tables are based on 12 months from 6.30.20 to 6.30.21. \*Sector Return is the 1-year total return of the Stratified Weight sector. Correlation is the cross-sectional correlation between active weight and sector return. Performance does not reflect fees or implementation costs.

#### Stratified SmallCap relative to the S&P SmallCap 600

US SmallCap	Q2	1 year
Stratified	4.9%	78.5%
S&P 600	4.5%	67.4%
Relative	0.4%	11.1%

The Stratified SmallCap Index outperformed the S&P 600 by **11.1%** over the last year.

#### Contribution to Relative Return

	Active	Sector	Relative
	Weight	Return*	Contrib.
Information	5.0%	100.6%	6.5%
Consumer	2.2%	125.1%	4.7%
IT	4.0%	63.2%	3.0%
Energy	1.3%	105.4%	2.7%
Healthcare	3.0%	51.6%	2.0%
Food	2.2%	75.4%	1.9%
Industrials	-9.5%	71.1%	-4.6%
Financials	-7.2%	54.1%	-4.7%
Correlation	0.3%	Relative	11.1%

The outperformance was partially driven by sector allocation.

The largest overweight (Information) outperformed and the largest underweight (Financials) underperformed.

The correlation between active weight and relative performance was 0.3.

#### Stratified vs Cap Weight Sector Performance

	Strat.	Cap	Diff
Information	100.6%	76.2%	24.4%
Consumer	125.1%	108.0%	17.1%
IT	63.2%	62.8%	0.4%
Energy	105.4%	95.7%	9.7%
Healthcare	51.6%	55.8%	-4.1%
Food	75.4%	72.5%	2.9%
Industrials	71.1%	59.8%	11.3%
Financials	54.1%	53.2%	0.9%
Relative			11.1%

The outperformance was largely driven by strong, diversified stock performance.

The Stratified Information and Consumer sectors both outperformed their cap weighted counterparts considerably for the year. These sectors had a larger allocation in Stratified Weight and hence contributed significantly to performance (11.2%).

Source: Syntax, Factset.

Contribution to Relative Return and Sector Performance tables are based on 12 months from 6.30.20 to 6.30.21. \*Sector Return is the 1-year total return of the Stratified Weight sector. Correlation is the cross-sectional correlation between active weight and sector return. Performance does not reflect fees or implementation costs.

### **Important Disclaimers**

This document is for informational purposes only and is not intended to be, nor should it be construed or used as an offer to sell, or a solicitation of any offer to buy, any security. Additionally, the information herein is not intended to provide, and should not be relied upon for, legal advice or investment recommendations. You should make an independent investigation of the matters described herein, including consulting your own advisors on the matters discussed herein. In addition, certain information contained in this factsheet has been obtained from published and non-published sources prepared by other parties, which in certain cases have not been updated through the date hereof. While such information is believed to be reliable for the purpose used in this factsheet, such information has not been independently verified by Syntax and Syntax does not assume any responsibility for the accuracy or completeness of such information. Syntax LLC, its affiliates and their independent providers are not liable for any informational errors, incompleteness, or delays, or for any actions taken in reliance on information contained herein.

Past performance is no guarantee of future results. The inception date of the Syntax Stratified LargeCap and Syntax Stratified MidCap Indices was December 27, 2016. The inception date of the Syntax Stratified SmallCap Index was January 3, 2020. The inception date of the Syntax Europe & Asia Developed Markets ("SEADM") Index was January 1, 2016. The inception date of the Syntax Real Asset Index was July 1, 2015. Charts and graphs are provided for illustrative purposes only.

Index performance does not represent actual fund or portfolio performance and such performance does not reflect the actual investment experience of any investor. An investor cannot invest directly in an index. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in a portfolio invested in accordance with an index. None of the Syntax Indices or the benchmark indices portrayed herein charge management fees or incur brokerage expenses, and no such fees or expenses were deducted from the performance shown; provided, however that the returns of any investment portfolio invested in accordance with such indices would be net of such fees and expenses. Additionally, none of such indices lend securities, and no revenues from securities lending were added to the performance shown.

The Syntax Stratified LargeCap Index, Syntax Stratified MidCap Index, Syntax Stratified SmallCap Index, SEADM Index are the property of Syntax, LLC, which has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) to calculate and maintain the Indices. The Indices are not sponsored by S&P Dow Jones Indices or its affiliates or its third party licensors (collectively, "S&P Dow Jones Indices"). S&P Dow Jones Indices will not be liable for any errors or omissions in calculating the Index. "Calculated by S&P Dow Jones Indices" and the related stylized mark(s) are service marks of S&P Dow Jones Indices and have been licensed for use by Syntax, LLC. S&P® is a registered trademark of Standard & Poor's Financial Services LLC ("SPFS"), and Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"). The MSCI EAFE Index was used by Syntax, LLC as the reference universe for selection of the companies included in the SEADM Index. MSCI does not in any way sponsor, support, promote or endorse the Index. MSCI was not and is not involved in any way in the creation, calculation, maintenance or review of the Index. The MSCI EAFE Index was provided on an "as is" basis. MSCI, each of its affiliates and each other person involved in or related to compiling, computing or creating the MSCI EAFE Index (collectively, the "MSCI Parties") expressly disclaim all warranties (including, without limitation, any warranties of originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose). Without limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, incidental, punitive, consequential (including, without limitation, lost profits) or any other damages in connection with the MSCI EAFE Index or the SEADM Index. Prior to March 19, 2018, the SEADM Index was calculate by NYSE. Sector subsets of the Syntax Stratified LargeCap, Syntax Stratified MidCap, and SEADM Indices are calculated using model performance generated in FactSet, and as such may differ from index calculations performed by S&P Dow Jones Indices. The Affinity Thematics are the property of Syntax, LLC, which has calculated their performance using Affinity™. Syntax will not be liable for any errors or omissions in calculating the Affinity Thematics. Syntax®, Stratified®, Stratified Indices®, Stratified-Weight™, Stratified Benchmark Indices™, Stratified Sector Indices™, Stratified Thematic Indices™, Affinity™, and Locus® are trademarks or registered trademarks of Syntax, LLC and its affiliate Locus LP.

The S&P 500® Index is an unmanaged index considered representative of the US mid- and large-cap stock market. The MSCI EAFE Index is an unmanaged index considered representative of the European, Australian, and East Asian large-cap stock market. Benchmark data for the S&P 500, S&P 500 Equal Weight, S&P MidCap 400, S&P MidCap 400 Equal Weight, S&P SmallCap 600, S&P SmallCap 600 Equal Weight, and S&P Real Assets Equity Indices are provided by S&P Dow Jones through FactSet®. Benchmark data for the MSCI EAFE index is provided by MSCI through FactSet.
